IDK Vectro

A fusion of form and feeling where mesmerising fluidity meets meticulous craftsmanship. Each piece is not merely made; it is sculpted, curated, and imbued with intent. A poetic expression of movement and materiality, it echoes the quiet strength and rhythm of water, pure, essential, ever-changing.

Hand-blown glass becomes the medium of memory, capturing a single moment, suspended in shape and shimmer. Every curve, every contour, is shaped by local artisans whose craft is guided by instinct and precision. The result is a sensorial ritual of wellness, of texture, of light made tangible.

This is more than a fixture. It's a gesture. A presence. A meditative interplay of reflection and clarity. Designed not to just be seen, but felt. To calm. To connect. To elevate the everyday into something extraordinary.

Welcome to a world where water becomes art, and craftsmanship becomes an experience.
